

Hi! I am Mustafa Tufan, a software engineer with a finance-based master degree. I am always in pursuit of designing the best software and writing the best line of codes. I am passionate about details, continuously think how to improve myself, where I am and what I do.

In the large majority of my career, I played Java developer role but I never fear to go on a new adventure. From my perspective, everything is a collection of tools to build amazing products, and I can figure out any of them in a reasonable time.
