

Mustafa Tufan Software Engineer

Hi! I am Mustafa from Turkey, a software engineer with a finance-based master degree. I am always in pursuit of designing the best software and writing the best line of codes. I am passionate about details, continuously think about how to improve myself, where I am and what I do.

Currently, I am searching for a job in Estonia. The main reason is that I believe Estonia is going to be the lead country of Europe in the IT field. I consider that as an investment to myself. Also, I would like to work in an English speaking environment and learn a second foreign language, like Estonian.
